

Structural Capacity of Existing Structures

UDOT 08C-02

Effective: November 19, 1998

Reviewed: March 19, 2015

Purpose

To provide guidance for Utah Department of Transportation (Department) evaluation of the structural capacity of existing state and local government structures not designed to current standards or of structures that are deteriorated.

Policy

The Department follows the current edition of the AASHTO Manual for Bridge Evaluation to determine the structural capacity of bridges and posting requirements.
